

# Linda L. Carlson

*Three Dimensional Fiber Artist constructing anthropomorphic figures and articles that project Shamanism and inner-spiritual feelings.*

**M**y inner world is a three-dimensional place. I strive as an artist to bring that inner world out to the viewer.

I create assemblages, collages, and paintings using layered imagery, fiber, found objects with their unique energy, and painting techniques as my language to tell of that world.

My work includes figures, shields, paintings, art quilts, containers, masks, environments, and performance art.

I am interested in the healing aspects of worldwide shamanism. For me, shamanism is a way to visit that three-dimensional place between worlds where spirits live. I use images and make articles and figures from experiences gained through journeying to that spirit place.

The oneness of all things has come to be a strong representation of my inner spiritual feelings. My hope is that I will continue to grow and manifest this to others as they view my art.

—Linda L. Carlson
